PROSPECT 33

STRATEGIC DIGITAL TRANSFORMATION

Our people are key to the successful realization of your digital ambitions.

Advisory

Where business efficiency is hindered by organizational complexity, we create and implement innovative digital operating models and process solutions.

Solutions

We deliver operational transformation through data-driven and intelligent process reengineering. We implement cutting edge FinTech solutions alongside incumbent technology and infrastructure.

Delivery & Resourcing

Our Data Scientists and Business Process experts are available to be rapidly deployed to ensure the successful achievement of your businesses goals.

Automation Ambition

All Financial Institutions have unique process maturity, capabilities, and priorities. We work closely with our clients to align their digital ambitions with data, business processes, and technology transformation initiatives to successfully deliver automation strategies and data driven solutions.

Understand & Solve

At the onset, we assess your operational status, challenges, and issues. It is essential for us to understand not only your current plans, but your desired outcomes and objectives. We then formulate and propose innovative solutions and intelligent execution options.

Throughout engagements, we provide thought-leadership and ideation, objective opinions, independent points-of-view, domain expertise, and industry perspective to support the solution.

Leverage & Apply

To fully support all your skilled resource needs and execution capabilities we are able to leverage our vast network of domain experts in Data, Data Science, FinTech, Operations, Risk, Finance, and Change Management.

Banking and Financial services lags behind many industries in the application of AI technologies. There are many underlying reasons for this fact and much work is to be done before we can see the sorts of analytical effectiveness we witness in our everyday lives.

Using Data Science, we apply AI and Machine Learning technologies to solve underlying problems in Financial Services and Investment Banking.

This is a quantum leap in technological innovation. Prospect 33 is pioneering the convergence of technological advancements in AI and Machine Learning with legacy systems to optimize business processes.

We begin by reasoning from first principles and use today's most innovative solutions to solve deep domain challenges.

Leveraging the latest methods in AI and machine learning, we help empower our customer's business with a level of sophisticated analytical ability never seen before.
