

# PROSPECT 33

# VIRTUAL DATA LAB

**We provide flexible data support utilizing our on-shore data lab comprised of highly skilled data analysts and scientists.**

**We enable our customers to extend their internal data capabilities through a managed services model.**

We provide domain skilled resources with a deep knowledge of Capital Markets & Financial Services from remote on-shore locations in the continents of the US & Europe to support hub locations such as New York, London, and other near-shore centers.

Our top-skilled data analysts & scientists enable our customers to reduce the cost & risk while substantially speeding up the engagement timelines of data analytics, governance & science resource teams.

## **DATA ANALYTICS AS-A-SERVICE**

We leverage a managed service model to provide a flexible draw-down of our resource teams measured against service-level-agreements.

- Data Analytics Support
- Data Management & Governance
- Data Wrangling-as-a-Service

## **DOMAIN SPECIALISTS**

We provide domain specialists with a wide array of expertise.

- Risk Management
- Client Lifecycle Management
- Client Data
- Front to Back Trade Lifecycle
- Front-Office Support

## **LOW COST, ON-SHORE PRICING**

Everything we offer is designed to meet the exacting standards demanded in our highly regulated and risk-focused industry while doing so at price points to fit realistic budgets:

- Flexible teams of on-shore and/or off-shore Data professionals, easily integrated with existing team structures
- Provided under a Managed-Services model
- Decreasing unit costs based on long-term volume utilization
- Right-to-hire
- 12-month service contracts
- Rapid scale-up
- Generating Alpha
